All of the following information must be completed prior to review. Missing information will result in the form being deemed incomplete and returned.

Original Plan Date:

'Reviewed By Engineering' Stamp Date (Plan must be attached):

Plan Revision #:

Field Measurement Date:

This certificate is to certify that the foundation for the above noted lot is:

- a) in general conformity with the minimum underside of footing and top of foundation wall elevations shown on the "Reviewed By Engineering" site grading plan;
- b) sited entirely on the correct lot and conforms to the applicable Zoning By-Law as follows:

Front Yard Set Back	Rear Yard or Water Set Back	Right Yard Set Back	Left Yard Set Back	As-Constructed Top of Foundation Elevation	As-Constructed Garage Cut Elevation

The top of foundation wall has been constructed to an elevation within +/- _____ metres of the elevation on the 'Reviewed By Engineering' site grading plan (or the attached as-constructed site grading plan).

The current foundation has been back-filled in general conformity with the 'REVIEWED BY Engineering' site grading plan (or the attached as-constructed site grading plan) to a tolerance of +/- _____.
