City of Kawartha Lakes - Medical Waste Register Program

The Medical Waste Register is available to residents and medical professionals who generate additional waste as a result of in-home treatment or other medical reasons. The program provides 50 free garbage tags per request to assist with managing waste volumes that exceed the limits established under the City's Waste Management By-law. Medical waste tags must be affixed only to bags containing medical waste. Bags containing a combination of household waste and medical waste may be refused at the curb.

Due to recent changes in waste sorting and accepted materials (including expanded organics and recycling programs), we are requesting that a new application form be submitted with each request for additional tags. Tags will continue to be issued in sets of 50.

To qualify for the Medical Waste Register:

1. Complete the top portion of the Medical Waste Registry Form (page 2);
2. Take the form to your health care professional to fill out the bottom portion. This will confirm that, due to medical reasons the address identified requires extra waste to be produced. **Your medical practitioner must sign the form;**
3. Email or mail the completed form to:

City of Kawartha Lakes
Public Works, Waste Management
322 Kent Street West, PO BOX 9000,
Lindsay, Ontario, K9V 4T7
recycling@kawarthalakes.ca

Please note that this program is intended only for residents with medical needs. It does not apply to large households, businesses, or individuals who exceed set-out limits for non-medical reasons.

For questions about the program, eligibility, or application process, please contact the City's Waste Management Department.

Thank you
