

## Construction Notice

June 23, 2026

Dear Resident,

The City of Kawartha Lakes will be undertaking a reconstruction project in the vicinity of your home or business. This work will take place on:

Bob Brown Way and Bradley Street in Pontypool

The scope of this project is to install new roadway, curbs, storm infrastructure, and sidewalk replacement.

This project has been awarded to Eagleson Construction. Construction is expected to commence on **July 6, 2026**. The project has an anticipated completion date of **October 2026**. Working hours are expected to be 7am to 6pm Monday through Friday, with occasional Saturday work if production is lost due to inclement weather or other factors.

This work will take place within the City's Right of Way. Pedestrian access to all buildings will be maintained throughout the project. You will be given advance notice, but at times there may be limited access to your building to complete certain aspects of the project. Disruptions will be kept to a minimum; however, at times will be unavoidable, for example when placing concrete curb and sidewalk.

**If you are aware of privately installed utilities that may be within or near the City's Right of Way, please contact one of the below listed staff so that the contractor can be made aware and costly repairs can be avoided. Examples of such utilities could include underground sprinkler systems, electrical lines for a lamp post, or sump pump discharge lines that are not connected to existing infrastructure.**

Due to the nature of the work and possibility of vibration from construction equipment Oza Inspections has been asked to conduct a survey of all buildings within the proposed construction area.

The survey includes interior/exterior inspection including photographs of buildings and structures, or portions thereof determined to be in close proximity to the construction activities. There is no cost to the residents for this service. Your permission and cooperation is greatly appreciated. All inspectors carry photo identification.

Please use caution when driving or walking through the construction site and be aware that heavy construction equipment will be operating throughout. To make sure you are visible to equipment operators, try to make eye contact with the operator if you are walking or driving near the equipment.

For current information about construction projects happening throughout the City of Kawartha Lakes please visit the Major Projects page located at
